EXPERIENCE

GirlScript Summer of Code, India

October 2024 - Present

Contributor

- Contributed to three open-source projects, developed new features, and resolved over 20 issues while optimizing code by 15%.
- Worked with a team of more than 50 developers and delivered industry-standard practices in improving code quality, and scalability, and contributing to high-impact community resources.

Google Cloud Facilitator Program, India

November 2023 - October 2024

Cloud computing

- Acquired hands-on knowledge of Google Cloud services, which include Compute Engine, BigQuery, and Kubernetes. I could train for more than 30 attendees, thereby boosting participation in the program by 25%.
- Built scalable solutions in the cloud, upgraded data pipelines by 20%, and released five serverless applications, proving my know-how of practical cloud architecture, problem-solving, and software development.

OctaNet Services Pvt Ltd., India

May 2024 - June 2024

Web Development Intern

- Developed interactive landing pages and applications with HTML, CSS, and JavaScript to optimize page engagement up to 30%.
- Designed a to-do list app and calculator highlighting front-end skills, giving them a very user-friendly interface if the clients require it.

PROJECTS

Online Gaming Site

July 2024

- Designed an interactive fully responsive web gaming platform based on HTML, CSS, and JavaScript. It showed 25% increased user engagement because games were easily surfed through various services being offered.
- Developed a subscription model for access to exclusive games, which proved to be highly essential to increase user satisfaction, leading to a 15% increase in player retention.
